& More!

- 1 in 7 children suffer from a learning difficulty of some type.
- Environmental toxins are directly linked to 3% - 30% of learning difficulties.
- Everyday items contain toxic chemicals that impair the neurodevelopment of children.
- No federal regulation exists for many of these toxic chemicals.
- New chemicals are introduced to the marketplace every year without safety testing.

COME LEARN ABOUT:

- Where to find these toxic chemicals and how they may be effecting your family.
- Healthy alternatives to everyday toxic products.
- Current legislative efforts to reduce exposure to toxic chemicals.
